Experience

Software Engineer at **Ati Motors (Robotics)** **Jun 2024 – Present**

Frontend Project – Sanjaya Analytics and Monitoring Platform

- Developed a comprehensive data-rich analytics application from scratch to visualize robots' trip data and performance metrics, improving data accessibility by 60% for stakeholders.
- Designed and executed a modern, fast, and maintainable **React.js** + **TypeScript** frontend with **Vite**, leveraging **Zustand** for efficient global state management, reducing page load times by 40%.
- Crafted a pixel-perfect, production-grade UI trusted by 1000+ active users, enabling real-time monitoring of robots' work insights and utilization through **REST APIs**, while maintaining 99.9% uptime.

Full-Stack Project – Material Tracking System

- Built a full-stack material tracking system using **Python**, **FastAPI**, **PostgreSQL**, and **Redis** on the backend with a **React.js** + **TypeScript** frontend, enabling real-time material tracking with staging area management and interactive UI visualization of material details and locations.
- Designed and implemented core business logic for fulfilling material requests from staging areas, including configurable **material**, **container**, and **workflow** management modules, integrated with external servers via **REST APIs** to fetch map data, staging area info, and book trips/deliveries.
- Reduced manual intervention by **90%** by automating the end-to-end material request process through structured configurable workflows, leveraging **Redis** for high-performance caching and real-time state management.

LLM-Powered Automated Reporting Workflow System

- Engineered an end-to-end intelligent reporting automation system using **n8n workflow orchestration**, **LLM agents with memory**, and **MCP tools** for SQL execution validation that converts natural language requirements into validated **SQL** queries with self-healing retry loops, eliminating manual query writing for 100+ users and achieving a 95% query success rate.
- Achieved measurable business impact by eliminating 65% of manual query writing errors and ensuring 95% on-time delivery of personalized reports through fully streamlined **PostgreSQL**/**MongoDB**-backed scheduling with **cron-based** triggers and multi-channel distribution via **email, webhooks, and chat integrations**.

Frontend Engineer Intern at **Ati Motors (Robotics)** **Jan 2024 – May 2024**

- Created a reusable **React** UI library with 25+ pre-built components, integrated **Jest** unit tests achieving 90% code coverage, established **Storybook** documentation, and implemented **CI/CD** using **Git**/**GitHub** and **GitHub Actions** with systematized unit testing, build, and release processes.
- Developed a **Human-Machine Interface (HMI)** frontend application using **React.js**, **TypeScript**, and **Zustand** for global state management, integrating **WebSocket** connections to stream real-time backend data and enable live robot operation monitoring and control.

Software Engineering Intern at **Stealth, ArtSpot Technologies** **May 2023 – Jun 2023**

- Launched a cross-platform **React Native** mobile app following **Agile** methodology, collaborating with a 4-member team and using **Git**/**GitHub**, reducing deployment time by 30% and improving team collaboration efficiency.

Education

Indian Institute of Information Technology (IIIT) **Dec 2020 – May 2024**

B.Tech in Computer Science and Engineering CGPA: 8.47/10

Relevant Coursework

Computer Science: Data Structures and Algorithms,Artificial Intelligence, Machine Learning, Object-Oriented Programming, Database Management System (DBMS), SQL, Operating Systems, Computer Networks, Cryptography, Internet of Things

Technical Skills

Languages	:	C, Python, Java, JavaScript, TypeScript, SQL
Frontend	:	React.js, TypeScript, Next.js, Node.js, Zustand, Material UI, REST APIs
Backend	:	FastAPI, Express.js, Microservices, WebSockets, Redis, GraphQL, API Development
Databases	:	MongoDB, PostgreSQL, MySQL
DevOps & Tools	:	GitHub, VS Code, Docker, Linux, n8n, Jira, Postman, CI/CD, Agile, SDLC
